

25X1A

4. Messrs. Houston and [REDACTED] talked with Messrs. Allardice and Cotter, of the staff of the Joint Congressional Committee on Atomic Energy, regarding our suggestion to amend the Atomic Energy Act of 1946 to clarify dissemination of foreign intelligence information in this field. The staff revised the language jointly agreed on by us and the AEC, but it is considered that the revision is much closer to our desires than previous drafts. Mr. Allardice subsequently informed me that the Committee this afternoon adopted the staff language with virtually no controversy. 28 June '54
